5. As per claims 1, 2 and 6, Mazzagatte teaches a method for sending a print job to a preselected recipient comprising:

encrypting a data stream received in a first peripheral device (i.e., print node, column 2, lines 21-29, 47-49 and column 8, line 57 – column 9 line 22), the first peripheral device being configured to:

store the data stream as encrypted data [column 2, lines 23-26 and column 8, line 66 – column 9, line 1]; and

in response to a first user input, access the encrypted data for printing a first hardcopy document using the encrypted data [column 9, lines 25-34, 56-65];

transmitting said encrypted data from said first peripheral device to a second peripheral device (i.e., printer, column 10, lines 12-29), the second peripheral device being configured to:

store the encrypted data [column 10, lines 25-38]; and

access the encrypted data for printing a second hard copy document using the encrypted data [column 10, lines 31-40].

6. As per claims 14, 15 and 19, Mazagatte teaches a printing system comprising:

a first peripheral device [printer 50, figure 3] comprising:

a processor for receiving data stream through a network [column 5, lines 41-51];

an encryption module for converting said data stream from plain text to cipher text [column 6, lines 15-20];

memory for storing the cipher text until access to said cipher text by a user is authorized [column 5, lines 52-64 and column 9, lines 27-35];

a printing mechanism for printing a hardcopy document corresponding to the cipher text [column 6, lines 4-9 and column 7, lines 29-34]; and

a sender module (i.e., email program) for transmitting said cipher text through said network to a preselected recipient as an attachment to an email message [column 6, lines 25-31].

7. As per claims 5 and 18, Mazagatte further teaches the method wherein encrypting data stream comprises encrypting said data stream using PGP technique [column 9, lines 8-18].

8. As per claim 9, Mazzagatte further teaches a sender module (i.e., email program) for transmitting said cipher text through said network to a preselected recipient as an attachment to an email message [column 6, lines 25-31].

9. As per claims 13 and 21, Mazagatte further teaches the method, wherein said first peripheral device comprises a manual input device for receiving instructions related to operation of said first peripheral device, said method further comprising receiving an instruction to encrypt said data stream, said instruction being input at said manual input device [column 7, lines 57-63].
